

**CERTIFICATE - TBA AND TBP FREE**

January 1, 2025

We certify that no fungicides or preservatives including 2, 4, 6-tribromoanisole (TBA) or 2, 4, 6 tribomophenol (TBP) are involved in the process to produce the Inca presswood products. The presswood pallets are produced from wood generated by local wood suppliers and include whole tree chips processed and delivered directly from the woods, sawmill chips that are produced from timber removed from the woods and wood waste generated by other local manufacturers.

All wood processed at the Inca facility is reduced to a small flake and dried to a moisture content of less than 3.5 percent prior to the presswood manufacturing. The Inca process is considered ISPM 15 compliant and no heat treating is required.
