Manufacturing & Composition
Inca Pallets are molded in one solid piece from dried wood fibers and environmentally safe synthetic resin in a compression mold under high pressure and temperature.

Low Moisture Content
Only 6 %-8% moisture content, no moisture transmission to product or packaging load on the pallet.

Approximate Surface Area
Top Deck: 765 sq. inches
Footprint: 76 sq. inches

Approximate Dynamic Load Capacity*
WEIGHT CAPACITY COLOR CODE PAINTED STRIPE
Ex Heavy 2500 lbs. White

*Load uniformly distributed on pallet deck. Actual load capacity is application specific & dependant upon the product, packaging, load containment & handling environment. The testing of Inca pallets with the intended application is strongly recommended.

4 Way & 2 Way Entry
4-way entry with lift truck. 2-way entry with pallet jack.

Nestability
A stack of 50 Inca Pallets nest approximately 7" high. For each additional pallet, add 2" to height of stack.

Rounded Corners & Tapered Legs
Pallets have all rounded corners and tapered legs which make them ideal for stretch or shrink wrapping.

Design for Safety
Because Inca Pallets weigh up to 50% less than conventional hardwood pallets, they are safer and easier to handle. And, there are no nails or splinters to damage product or injure personnel.

Full Truckload Capacity
Quantities vary with pallet size and weight per truckload, typically:

<table>
<thead>
<tr>

</table>

Export Approved!
Save money, time & costly delays. Inca presswood pallets are welcome worldwide. They are considered "processed wood" per ISPM 15 export wooden packaging regulations. No extra, costly treatment against infestation is required!
