

April 29th, 2017

To Whom It May Concern,

This letter is provided on behalf of Litco International, Inc. by MBDC, LLC. This letter is meant to provide insight into the composition of Litco's Inca Presswood Products, and more specifically meant to provide insight into the percentage of bio-based material within the Inca Products. MBDC can verify that the Inca Presswood Products contains no less than 88.0% bio-based content.

MBDC can verify this because during the certification process, we inventoried and assessed all ingredients above 100 ppm. During our investigation, we found that 88.0% of this product is comprised of cellulosic materials.

Sincerely,

Taylor Burgdorf
Senior Environmental Chemist
